

Facility Sharing

Product development companies and solution providers may wish to utilize any opportunity to reduce operational cost to increase profit margin. By considering this situation, STI offers part of its infrastructure with resources, systems and software on short to long term contract to those in need to reduce the cost of products being developed.

Salient Features:

- Confidentiality will be ensured at all levels
- 20000 square feet facility in downtown of Chennai, India
- 512 kbps leased line
- Resources available in the platforms like
Sun–Solaris, HP–Unix, IBM–AIX, Windows–NT & 2000
- Space and resource allocation possible in a short notice
- Possibility to have add on services like project management
- Workspace can be managed either through STI or directly by the client
- Provision for short term or long term contract business deals
- The clients can use the extensive support of Call-Center provided by STI itself
- Low cost leading to effective and more resource utilization
- Availability of extensive technical support if needed
- Appeasing infrastructure to create a good working environment

With all the above said features, STI would be the appropriate place for the organizations looking an effective resource sharing partner for their development process with reduced operating cost.
